

Does it matter which company I buy the Sentricon System from? There are other differences other than price. There are different ways to monitor the stations and there is different Sentricon bait. Each company decides which bait and monitoring system they will choose to offer. The warranties are also left up to each pest control company and can vary a little to a lot from company to company.

When you choose to work with Dr. Jack's you get the latest Sentricon system for termite control, Sentricon Always Active with Recruit HD.

We are one of only 5% of Central Florida pest control companies who are authorized to install and treat termites using this revolutionary new termite baiting system.

Dr. Jack's has been awarded **#1** in customer retention in Central Florida over 10 years in a row when compared with all other Sentricon operators. Sentricon (Dow AgroSciences) is the only product in our industry that limits the number of authorized operators, which maximizes quality assurance and accountability. Sentricon has been documented to be the most effective post-construction termite treatment and the first bait to have documented research data to support total colony elimination.

Dr. Jack's includes one of the best 1 million dollar termite repair warranties with each Sentricon system. Some companies will offer a repair warranty with a lot of loopholes that will keep them from paying claims. Not with Dr. Jack's! Dr. Jack's termite warranty doesn't include a lot of loopholes and is so straight forward that you don't need an attorney to understand it.
