

## Homeowners love the Sentricon System.

Why do more people prefer the Sentricon<sup>®</sup> Termite Colony Elimination System than any other brand?<sup>1</sup> Why has it been chosen to protect more than 2 million structures? Why would the caretakers of the White House, the Statue of Liberty and other national treasures select the Sentricon System?

### Did you know?

Those round metal circles you see on the sidewalk in the French Quarter of New Orleans are not secret stashes for beads. They're Sentricon station covers.

Termite colony elimination is most people's primary reason. The Sentricon System is known to eliminate the termite colony, not just individual termites.

Another big reason why homeowners prefer the Sentricon System is that it's easy to live with. It's a lot gentler on the home, the yard and the environment than traditional liquid chemical treatments. Plus, ongoing professional monitoring helps homeowners feel secure that termites are no longer a threat.

Maybe that's the best reason of all. With continued service, you can actually — yes, it's possible — forget about termites.

The Sentricon<sup>®</sup> System. No more colony. No more problem.<sup>™</sup>
